

SUCCESS STORIES

Event Surveillance

**A QUICK, RAPID DEPLOYABLE, TEMPORARY SECURITY
SOLUTION FOR EVENTS**

Mobiqam is a mobile, autonomous and rapid deployable surveillance system, specially designed to protect and monitor events attendees. It is easy to use, reliable, and a cost-effective way to improve security at any event. It can be easily moved around to cover the perimeter and different areas to eliminate blind spots. Mobiqam is perfect for outdoor events as it is weatherproof and can withstand the elements. Ideal for local, sports and music events, Mobiqam can also be combined with different sensors to help notify authorities when suspicious activity is detected or even when someone is in distress.

FIXED CAMERAS REINFORCEMENT DURING FESTIVITIES IN HASSELT

LIVE MONITORING

The Jeneverfeesten in Hasselt, Belgium, is a large festival with 150,000 visitors and 25,000 litres of liquor served.

The police force of Hasselt strengthened their fixed camera network with Mobiqams to keep an extra eye on the festivities. By equipping Mobiqam with a wireless point-to-point connection, the organisers were able to monitor the event with continuous livestreams.

Combined with different sensors, Mobiqam can provide event organisers with data-driven insights. This data helps event organisers to improve layouts and business opportunities by identifying popular areas, optimising amenities, and reducing congestions.

KEEPING THE PEACE AT DEMONSTRATIONS IN BRUSSELS

DEMONSTRATIONS

The heart of Europe, Brussels, is the place to be for people to demonstrate. To ensure the peace at demonstrations, the city of Zaventem, home of Brussels Airport, temporarily set up Mobiqams to live monitor the crowd.

To elevate the level of security, Mobiqam can use different sensors, such as control access to restricted areas and alert authorities when people enter non-authorized zones.
